

ISO14001:2015 Environmental Policy Statement

Elemental Healthcare Ltd was established in January 2007 and is a leading distributor providing innovative solutions in Minimally Invasive Surgery, Bariatric Surgery and Diagnostics. Elemental Healthcare Ltd was acquired by Surgical Innovations Group PLC with the acquisition completed on 31st July 2017. Elemental continues to operate as a separate subsidiary with no impact to procurement.

Working with market leading companies Elemental Healthcare Ltd has brought together a unique and exciting portfolio and aims to sell only “best-in-class” products. As the world struggles to fund healthcare as a consequence of the global financial crisis, there is a temptation to sell the cheapest instruments possible. We believe that in Healthcare, quality always wins in the end, and customers are always happier with a product that works well every time.

Elemental Healthcare Ltd employs a highly trained direct sales team providing national UK coverage supported by a dedicated Customer Service department based from our Head Office in Hungerford, Berkshire. The Directors, management and support staff have many years’ experience in the sales, training and product support of medical devices and have been involved in bringing many new innovative products to the market to enhance patient care.

We are committed to reducing waste in the supply chain to the hospital and we believe that we are well placed to help our customers reduce their environmental impact by providing a range of ‘responsible’ instruments and devices. Our ‘responsible’ products create a fraction of the waste of comparable fully disposable instruments. This is of significant benefit to the environment and also to the hospital as it spends less on the disposal of clinical waste.

We hold certification to ISO 9001:2015 and to ISO 14001:2015 and we are committed to the continual improvement of our management system with the intention of enhancing our environmental performance. We set annual Objectives and KPIs which help us to manage our business risks effectively, monitor and where possible, reduce our environmental impacts on both the local and wider environment. We are committed to the reduction of waste to the lowest possible levels and we ensure that any unavoidable waste is recycled wherever possible.

We are committed to the protection of the environment and the prevention of pollution, both on a personal level as the majority of our staff live locally but also due to the increased expectation of our customers that Elemental Healthcare is a responsible company operating in a sustainable way.

This Environmental Policy Statement and the associated Manual are fully supported by the Directors and Senior Management Team who take responsibility for the effectiveness of our system in complying with all applicable legal requirements and other compliance obligations. The Directors and Senior Management Team are committed to reviewing this Policy Statement on an annual basis to ensure that it still supports the achievement of our strategic direction. This Quality Policy Statement is available to all our employees and is also available to other interested parties on our website. Copies of the minutes (or relevant extracts) of the Management Meetings are provided to individual members of staff in accordance with their role and responsibilities as a means of communicating the commitment to our management system.

Signed:

Adam Power, Managing Director

David Marsh, Managing Director
